E-Stores

Net Lynk are constantly looking to improve potential opportunities for our customers. We have a proven well tested e-commerce solution in order to provide a mechanism to take full advantage of all accessory and equipment sales to their customers via the internet.

Net Lynk utilises its own in house specialist IT development team to provide a highly flexible e-commerce solution, we have numerous companies utilising our on line engine. This technology is now well proven with millions of pounds being processed throughout our hosted internet shops.

As part of the commitment to keep customers updated with the progress of their orders, various customer communications are provided at key points of the process including point-of-order, payment processing and point-of-despatch.

We also understand that these sites need to look seamless and branded to suit our customer, with our in house development team these requests are instant and we can often have your site integrated within the day.

· Branded portals

· Content management systems
